

The Nuts & Bolts of... PCI Compliance, EMV Compliance & Data Security

What is PCI Compliance?

PCI compliance means *merchant* adherence to Data Security Standards (DSS), a set of rules and regulations enacted by the Payment Card Industry (Visa/MasterCard/Discover/AMEX) in order to help protect your customers from credit card fraud. Merchants face extensive fines, penalties and fees for non-compliance.

What is EMV Compliance?

Established by Europay, MasterCard & Visa (EMV), EMV refers to the “chip-enabled” type of credit card. Per the liability shift of October, 2015, merchants—rather than the credit card companies—are now liable for costs relating to card fraud whenever a chip-enabled card is processed via the traditional “swipe” method. To avoid related chargebacks, merchants must have payment processing devices that accept chip cards.

Do I Need to be PCI Compliant or EMV Compliant?

You, the merchant, need to be compliant with BOTH PCI and EMV regulations.

My POS Provider is PCI Compliant...Why Do I Need to Be?

POS providers must be compliant with PA-DSS—security standards that apply to companies that manufacture Payment Application (PA) systems. PCI DSS requirements are SEPARATE from PA-DSS and must be adhered to by the merchant.

PCI Compliance Only Protects Card Data. What About All the Other Data on My Network?

Merchants are *still* vulnerable from **network** breaches and threats. That’s why we protect your ENTIRE environment!

What Do I Need to Do to Become PCI & EMV Compliant—and Protect My Network?

For PCI compliance & Network Protection: Our **PDQ Security** package encompasses everything you need to help you become PCI compliant—and protect your *entire* environment.

For EMV compliance: A simple upgrade to our PCI-approved EMV payment processing device is all you need!

WHAT YOU GET

For PCI Compliance *and* Comprehensive ENTIRE Environment Data Protection:

- **PDQ Security**
 - * Next-gen Unified Threat Management (UTM) Firewall (hardware)
 - * Next-gen Endpoint (software)
 - * Next-gen Unified Security Management with Intelligent Security Monitoring & Event Remediation (software)

For EMV Compliance:

- **VeriFone**
 - * EMV payment processing unit(s) w/locking mount (hardware)

About Signature Systems

For over 31 years, we have been a marketplace leader with PDQ POS, an innovative, award-winning POS system for pizzerias and quick service restaurants.

Touted as “the fastest POS on the planet” and the easiest to learn and use, the feature-rich, EMV & PCI compliant PDQ POS system comes with a unified cyber-security platform that protects a store’s *entire* environment from data breaches and cyber-threats.

Signature Systems—the Only POS Provider That Does it All!
